

## EXP NO 1: CREATE A SIMPLE CLOUD SOFTWARE APPLICATION AND PROVIDE IT AS A SERVICE USING ANY CLOUD SERVICE PROVIDER TO DEMONSTRATE

SOFTWARE AS A SERVICE (SAAS).

**DATE: 25-09-2025**

### AIM:

To create a simple cloud software application and provide it as a service using any cloud service provider to demonstrate software as a service (saas).

### PROCEDURE:

STEP1: GOTO ZOHO.COM

STEP 2: LOGIN TO THE ZOHO.COM

STEP 3: SELECT ONE APPLICATION

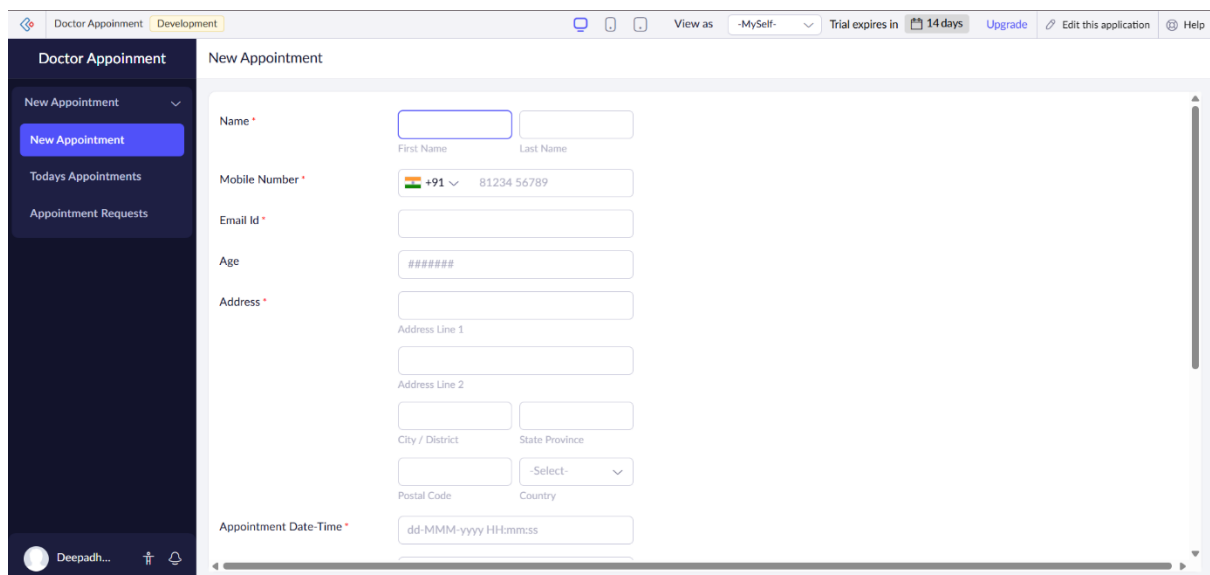

STEP 4: ENTER APPLICATION NAME

STEP 5: CREATED NEW APPLICATION

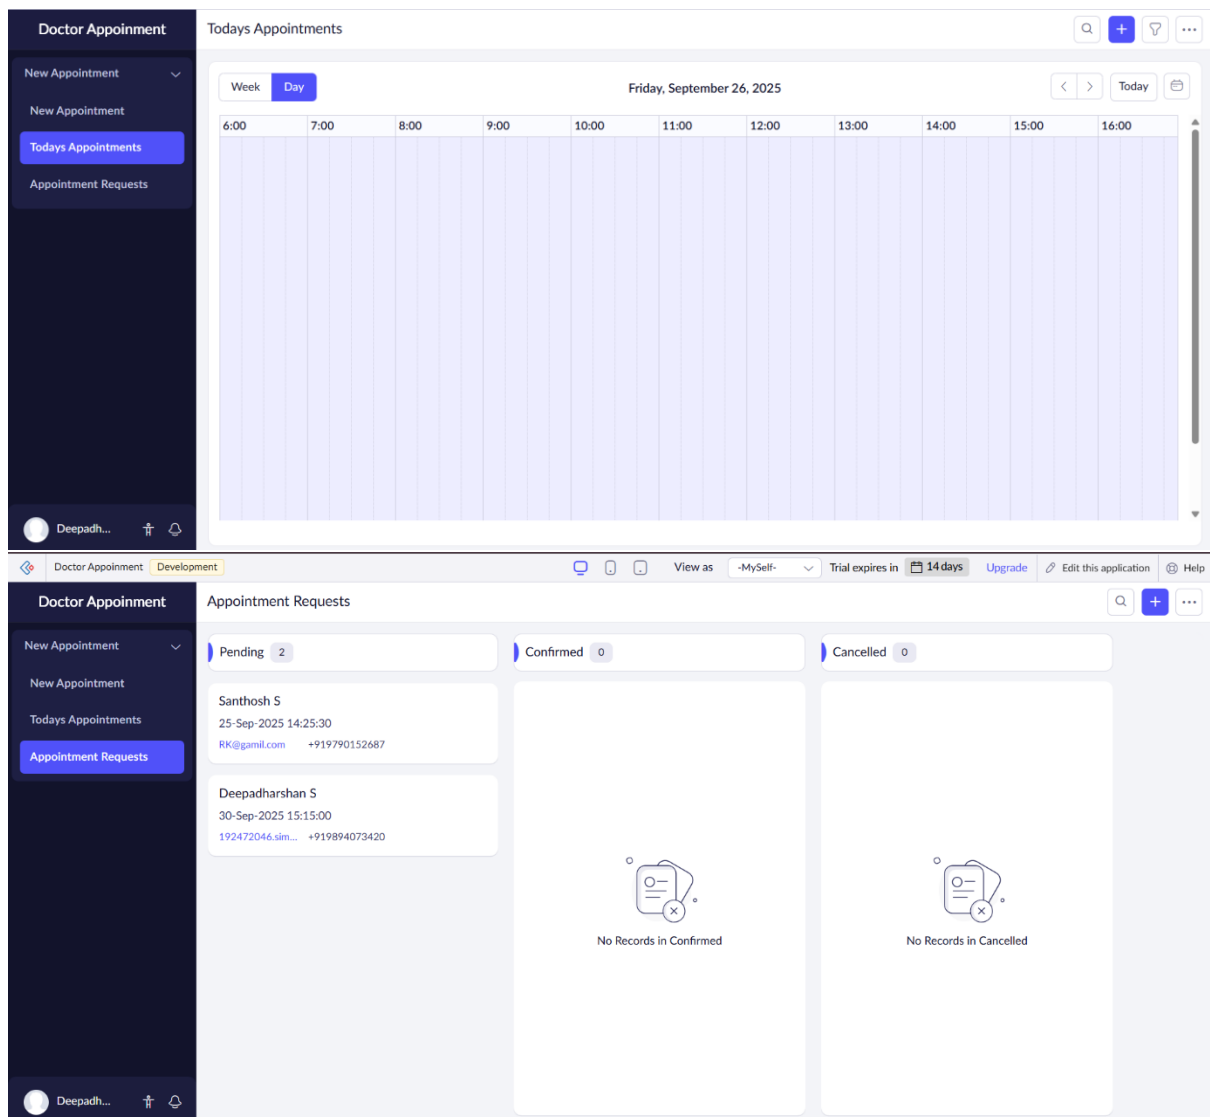

STEP 6: SELECT ONE FORM

STEP 7: THE SOFTWARE HASE BEEN CREATED.

### OUTPUT :

The screenshot displays the Zoho Creator interface for a 'Doctor Appointment' application. The top navigation bar includes the application name, a 'Development' mode indicator, and various utility links like 'View as', 'Trial expires in 14 days', 'Upgrade', 'Edit this application', and 'Help'. A dark sidebar on the left contains navigation options: 'New Appointment' (selected), 'Today's Appointments', and 'Appointment Requests'. The main content area, titled 'New Appointment', contains a form with the following fields: 'Name' (split into 'First Name' and 'Last Name'), 'Mobile Number' (with a country code dropdown set to '+91' and a value of '81234 56789'), 'Email Id', 'Age' (with a placeholder '#####'), 'Address' (split into 'Address Line 1' and 'Address Line 2'), 'City / District' and 'State Province' (both with dropdown menus), 'Postal Code' and 'Country' (both with dropdown menus), and 'Appointment Date-Time' (with a placeholder 'dd-MMM-yyyy HH:mm:ss'). The bottom of the screen shows a mobile-style status bar with a profile icon, the name 'Deepadh...', and system icons for signal, Wi-Fi, and battery.

## RESULT :

A simple cloud-based software application was successfully created in Zoho Creator. The application allowed storing and displaying data through forms and reports and was provided as a service by publishing and sharing it over the cloud. The app could be accessed through a web URL and integrated via Zoho Creator's built-in REST APIs, thereby demonstrating the concept of delivering software as a service (SaaS).
